Full stack Developer || (React JS, Node JS, TypeScript, JavaScript)

FULLSTACK DEVELOPER

Experienced Full Stack developer with demonstrated history (9 years of experience) of working in the various technology like **React JS, Redux, JavaScript, TypeScript, GitHub, Node JS, Express, GraphQL, Express JS, Mongo DB, AWS, HTML, CSS**. I have good experience in analyzing requirement and building application.

Experience

Technical Lead, Wipro
Jan204 – Till Now

Project: Cost Estimate Experience (CEX)

CEX has been developed for client Optum and It's a healthcare organization. It sells health insurance. CEX is being developed to get cost estimation of a medical service

TECH USED: **React JS, TypeScript**, Redux, React Router, **Node JS**, GraphQL, HTML CSS, Git

My Role: Manage web development Team. **Analyze and solution** requirements. Development the web component.

Senior Web Developer, Infosys limited.

APR 2019 – JAN 2024

PROJECT: B2B EPOM

B2B EPOM is for tracking B2B transactions and change the data related to vendors. Trigger the different state to test the E2E transaction in Non-Prod Environment. This platform also helps to manage user access for other applications.

PROJECT: Service and Logistic Operation Document

This application enables to upload and download B2B transaction related data based on some input.

PROJECT: Vendor Automation Tool (VTA)

VTA tool provide ability to add test data and execute the test cases. Here, we fetch test case details from UI Path (an environment, where test case details and data and bots are stored to execute the test cases)

TECH USED: JavaScript, **React JS (4 years+)**, **Angular 2+ (1 years+)**, CSS, HTML, GIT, CI/CD Pipeline, Mongo DB, Agile Methodology

MY ROLE

- I was part of requirement analysis, solution designing and development of the variety of applications.
- I have developed large scale, production ready product (VTA) from scratch and owned the product for development, deployment, and enhancement.

Software Engineer, Mindtree limited. DEC

2015 – APR 2019

PROJECT: CIS PEOPLEHUB

Manage the Mindtree employee's data and enable users to access their data.

TECH USED: JavaScript, Angular 2+ (1yr+), **React JS (1years +)**, CSS, HTML, GIT, Bootstrap

MY ROLE

- Contributed to application design and development.
- Added new functionality to web page and enhanced the existing functionality.
- Worked on rest API development.
